

Do you have high-speed or one mould runs in your machine park?

We can help you increase the productivity of your Sumitomo (SHI) Demag injection moulding machines. Our „Machine tuning“ service offer is the ideal solution for doing this.

One of our software engineers will optimise your injection moulding machine on site and adjust the dynamics of the mould, ejector and core movements to your mould and to your peripherals.

Scope of services provided:

- Reduction of the cycle time
- Determining and eliminating „delay times“
- Modification of the acceleration and deceleration ramps for all machine movements
- „Harder“, but still good dead-on positioning operation
- Utilisation of performance reserves
- Activation and optimisation of parallel movements

Benefits:

- Increase in production of up to 15%
- Optimised process runs
- Cycle time reduction

Your Sumitomo (SHI) Demag After Sales Team will be happy to prepare a detailed offer for your machines.

Tuning -
for your
injection moulding machine
